## Senior Frontend Developer

Glyfada, Attica, Greece

### Description

ARCHITECHTS is building innovative software products, developed by expert teams in Greece and in the Netherlands. We integrate new concepts and smart technologies to imagineer the most high-end, meaningful products for enterprises.

We are people oriented with the following characteristics:

- Value efficiency and respect other people's time
- We are team players and have a strong work ethic
- Always learn and have fun

As a tech company, we are making substantial investments in our software to enable our next stage of high growth, and we are looking for a talented Senior Frontend Developer to join our growing product development team, creating a state of the art digital decision platform. The team is distributed across Athens and the Netherlands.

If you have excellent programming skills and a passion for developing applications, we would like to meet you. As a Senior Frontend Developer, your primary focus will be the architecture and the development of the user interface, ensuring high performance and responsiveness to the users.

#### What you'll do

- Technical design and architecture
- Code new features as well as maintaining existing features
- Write technical documentation
- Participate and run code reviews
- Prototype new and redesign features
- Provide unsolicited advice on the product
- Fixing bugs

#### What to expect

- To work in agile, cross-functional teams
- To define not just how things work, but what we should be building
- To design lots of new stuff from scratch and revamp many of the existing functionalities
- A team that constantly raises its standards of work
- A rapidly growing company with top talented people
- Trust and autonomy
- To experiment, learn and have fun

## Requirements

- BS in Computer Science or equivalent relevant experience.
- Excellent experience with frontend stack
- Excellent experience with at least one frontend framework building web applications
- Excellent experience with browsers APIs
- Excellent experience with semantic html and css
- Excellent experience building high-performance web applications.
- Excellent experience with cloud based applications and application deployment
- Experience with git and docker
- Ability to learn and stay up to date on new technologies and trends
- You care about software quality and performance
- Bonus: Angular production experience
- Bonus: AWS production experience
- Bonus: Open source projects contributor

## Benefits

- Competitive salary
- Workstation
- Complimentary accommodation in ARCHITECHTS locations
- Being part of a working culture which embraces autonomy and initiative taking
